6.	The unit quartered in Oranienburg castle engaged in field training and drill with mortars during the time of observation. Units totaling about 900 men wearing red-bordered black epaulets marched into the castle on 18 March, presumably returning from a practice march with full pack.	
1.	Comment. The occupation of the Sachsenhausen concentration camp is known from previous reports. Most of the troops came from Grossenhain. vehicle was observed it departed in Grossenhain. The troops left Grossenhain on 3 or 4 April and arrived in Oranienburg on 11 April, which indicates that some of the units transferred by road, using the motor vehicles available in shuttle traffic.	25 X 1
2.	comment. The strength estimate of about 2,000 men is believed correct, as it corresponds with the KVPD in Grossenhain which moved to the Sachsenhausen concentration camp. The information on the organization of units there cannot be commented on. It cannot be said where the rocket launcher battalion came from. It can be assumed, however, that a mechanized unit exists in the Sachsenhausen concentration camp and that this unit already has the strength of a mechanized regiment which could be brought up to a mechanized division.	5X1
3。	Comment. These units probably belongs to the AAA officer school which numbers about 1,200 troops and which is quartered in Oranienburg Castle.	25 X 1
